

Warehouse column protection h439_16

Round PE column guard with RA1 reflective marking for 160 x 160 mm posts. Dimensions: Ø 620 x H 1100 mm.

The **H439_16 column protection** is a solution designed to offer **maximum visual and structural safety** in warehouses, industrial plants, and logistics areas. Made of **high-resistance polyethylene**, it is equipped with **reflective visual signaling (RA1)** in red and white, which improves the pillar's visibility even in low-light conditions.

The **round** shape ensures **uniform coverage** for columns and posts measuring **160 x 160 mm**, protecting them from accidental impacts with forklifts, pallet jacks, and reach trucks. The **Velcro strap fastening** system makes installation **fast and tool-free**, with **no drilling required**. It only takes **one person to assemble it**, in a few minutes and without structural interventions.

Ideal for **indoor and outdoor use**, thanks to the material's resistance to weathering and chemicals, this protection ensures **durability, visibility, and ease of use**. Supplied **pre-assembled**, it is immediately ready for installation.

Protect your warehouse columns with **model H439_16**. Visibility and safety in a single solution. Request a quote now for corporate supplies.

Technical features:

- **Material:** High-resistance Polyethylene (PE)
- **Color:** Yellow with RA1 reflective signaling (red/white)
- **Shape:** Round
- **Height:** 1100 mm
- **Diameter:** 620 mm
- **Net weight:** 17.5 kg
- **Pillar compatibility:** 160 x 160 mm
- **Assembly:** With included Velcro straps (no holes or tools)
- **Delivery:** Pre-assembled
- **Mounting position:** Columns/pillars
- **Field of application:** Indoor and outdoor
- **Warranty:** 1 year

User benefits:

- **High visibility:** thanks to RA1 reflective signaling.
- **Protection:** 360° for 160 x 160 mm columns.
- **Assembly:** quick and easy for one person.
- **No drilling:** or tools required.
- **Resistant:** to impacts, weather agents, and chemicals.

FAQ:

1. What pillar sizes is this protection suitable for?

It is compatible with 160 x 160 mm posts and columns.

2. **Do I need to drill the floor or the column for installation?**

No, the fastening is done using the included Velcro straps, without any need for drilling.

3. **Is the reflective signaling visible in the dark?**

Yes, the RA1 marking reflects light and improves visibility in poorly lit environments.

4. **Is it also suitable for outdoor use?**

Yes, the material is weather-resistant, ideal for indoor and outdoor use.

5. **Can I assemble it myself?**

Yes, it is designed to be installed by one person, without using tools.

Mini buying guide:

If you are looking for **effective and highly visible protection for warehouse pillars**, the H439_16 model is the ideal choice.

Its **round shape, ease of assembly**, and **reflective signaling** make it a suitable solution for those wishing to **prevent structural damage** and **ensure operator safety**.

Always check the **pillar size** and choose durable materials for demanding environments like industrial or logistics ones.

Column protection with reflective signaling, round warehouse column guard, 160x160 mm pillar protection, industrial bumper with velcro, high-visibility warehouse column guard, column protection for indoor and outdoor use.
