

Impact protection for warehouses h439_21

TÜV-certified L-shaped protection for shelving and corners, height 400 mm, leg length 180x180 mm, in yellow/black painted steel.

The **h439_21 L-shaped impact protection** is the ideal solution for safety in warehouses, depots, workshops and industrial areas. Designed to **protect the corners of shelving, columns and critical points** subject to accidental impacts, it reduces the risk of damage to structures and infrastructure.

Made of **5 mm thick steel**, it is resistant to impacts caused by forklifts and pallet trucks. The powder-coated surface in **safety yellow with black bands** ensures high visibility, preventing accidental impacts.

Certified **TÜV compliant with the DGUV 108-007 standard**, it guarantees compliance with the safety standards required for industrial and logistics areas.

The **180 x 180 mm L-shape** is perfect for protecting corners of shelves or walls, while the compact dimensions (W 230 x D 230 x H 400 mm) make it ideal even in small spaces. The product arrives **pre-assembled**, ready for **bolting to the ground** through the 4 pre-drilled holes (fixing material not included).

Invest in safety and protect your warehouse from damage and production downtime! **Buy the h439_21 impact protection now** or request a **personalized quote**.

Technical features:

- **Material:** Powder-coated steel
- **Thickness:** 5 mm
- **Shape:** L-shaped 180 x 180 mm
- **Total dimensions:** W 230 x D 230 x H 400 mm
- **Base plate dimensions:** W 50 x D 50 x H 5 mm
- **Color:** Yellow with black bands
- **Net weight:** 5.89 kg
- **Assembly:** Floor bolting (4 holes, material not included)
- **Delivery:** Pre-assembled
- **Certification:** TÜV – compliant with DGUV 108-007
- **Warranty:** 1 year

User benefits:

- **Protection:** effective for corners of shelving and columns.
- **High impact resistance:** thanks to the 5 mm steel.
- **High visibility:** with yellow/black safety colors.
- **Easy to install:** via bolting.
- **TÜV certified:** compliant with current regulations.

FAQ:

1. **Is this protection suitable for outdoor environments?**
No, it is designed for indoor use on industrial floors.
2. **Is it supplied with the fixing kit?**
No, the fixing material must be purchased separately.
3. **Is it certified according to safety regulations?**
Yes, it is TÜV certified compliant with the DGUV 108-007 standard.
4. **Is it easy to install?**
Yes, it arrives pre-assembled and simply needs to be fixed to the floor.
5. **Which structures can it protect?**
It is ideal for protecting the corners of shelving, columns and walls in industrial environments.

Mini purchasing guide:

When you need to protect critical points such as **shelf corners or columns**, always choose certified and visible products. The h439_21 model is designed to guarantee **safety, resistance and visibility**, thanks to the TÜV certification and the high-perception yellow/black color.

The compact dimensions make it suitable for **all warehouses**, while the 5 mm steel structure offers **maximum protection against accidental impacts**.

Opt for a pre-assembled and easy-to-install solution to **improve safety without complications**.
