

Warehouse pillar protector h439_18

Round PE protection with RA1 reflective signage for 260 x 260 mm posts. Dimensions: Ø 620 x H 1100 mm.

The **H439_18 pillar protector** is designed to guarantee **effective protection and increased visibility** for structural columns in industrial and logistical environments. Made of **high-resistance polyethylene**, it is ideal for securing **260 x 260 mm posts**, protecting them from impacts with forklifts, pallet trucks and other warehouse equipment.

The **round** shape completely surrounds the pillar, offering **total coverage**. The presence of **red and white RA1 reflective strips** improves visibility even in low-light conditions, increasing operational safety. The **yellow color** makes the bumper immediately recognizable in any work context.

Extremely easy to install thanks to the **included velcro fastening**, it requires no tools or drilling: one person is sufficient for assembly. The product is **supplied pre-assembled**, ready to be positioned.

Suitable for both **indoor and outdoor use**, it resists impacts, atmospheric agents and chemicals, making it a **durable, reusable and highly visible** solution.

Secure your industrial environments with the H439_18 bumper. Request a personalized offer for large-scale supplies now.

Technical features:

- **Material:** High-resistance Polyethylene (PE)
