

Warehouse pillar protection h439_17

Round PE warehouse column protection for 210 x 210 mm columns with reflective bands. Dimensions: Ø 620 x H 1100 mm.

The **H439_17 pillar protection** is designed to offer a **safe and high-visibility barrier** against accidental impacts in industrial environments, warehouses, and logistics areas. Designed for **210 x 210 mm** columns and posts, it guarantees **complete 360° coverage** thanks to its **round shape** and compact design.

Built in **high-resistance polyethylene**, it is equipped with **RA1 red and white reflective signage**, making it **highly visible even in low light conditions**. Ideal for **indoor and outdoor use**, it is resistant to impacts, weathering, and chemical agents, ensuring long-lasting protection over time.

Fixing is simple and immediate: **it does not require drilling or tools**. Thanks to the **velcro straps included**, installation can be carried out by a single person in just a few minutes. The product is **supplied pre-assembled**, ready for use.

Increase your warehouse safety with the **H439_17 pillar protection**. Contact us for multiple orders or tailor-made solutions for industrial environments.

Technical characteristics:

- **Material:** High-resistance Polyethylene (PE)
- **Color:** Yellow with RA1 reflective signage (red/white)
- **Shape:** Round
- **Height:** 1100 mm
- **Diameter:** 620 mm
- **Net weight:** 18 kg
- **Pillar compatibility:** 210 x 210 mm
- **Assembly:** Velcro straps included (no tools)
- **Delivery:** Pre-assembled
- **Mounting position:** Columns/pillars
- **Field of application:** Indoor and outdoor use
- **Warranty:** 1 year

User benefits:

- **Coverage:** full for 210 x 210 mm columns.
- **High:** visibility thanks to reflective marking.
- **Installation:** simple and fast, even by a single person.
- **No drilling:** velcro fastening system.
- **Ideal:** for indoor and outdoor environments with vehicle traffic.

FAQ:

1. **Which columns can this version protect?**

It is designed for 210 x 210 mm pillars.

2. **Do I need to use drills or tools for assembly?**

No, installation is done without drilling, using the included velcro.

3. **Is it suitable for outdoor use?**

Yes, the PE material is resistant to weathering and chemical agents.

4. **Is the reflective signage effective even in dark environments?**

Yes, the RA1 marking reflects light and ensures visibility even in the dark.

5. **Is it easy to move or reuse?**

Yes, it can be dismantled and reinstalled quickly in another position.

Mini buying guide:

To protect pillars in environments with vehicle traffic, it is essential to choose **resistant, highly visible, and easy-to-install bumpers**.

The H439_17 model combines **robustness, visual signaling, and ease of use**.

The **round shape** ensures 360° coverage, while the velcro system allows for **quick installation without structural interventions**, ideal for dynamic contexts subject to changes.

Warehouse pillar protection 210x210, industrial column bumper with velcro, round column protection with reflective signage, warehouse impact protection, high visibility column bumpers, post protection indoor and outdoor use.
