Wash basin with hot plastic available in different colors. Size 75x60x84cm (WxDxH). Made in Italy.

Mdf doors with rounded edges, lacquered in white or various colors with a matte finish. The MDF (medium density fibreboard, medium density fibreboard) is a derivative of wood is the most famous and widespread family of fiber panels comprising three distinct categories based on the process used and the density: low (LDF), Average (MDF) and high (HDF).

The structure is in coated panel waterproof, which is a waterproof material that does not absorb water. The melamine is a panel of wood particle board coated on one side, or on both sides, with melamine paper, which is a synthetic material made of thin sheets of paper (around a tenth of a mm) impregnated with melamine resin. The use of such a card causes the coated panel is often also called melamine panel (or melamine) The panel can be formed over that of chipboard (also from recycled timbers), also from hardboard, from plywood, wood printed, OSB or MDF. It is characterized by remarkable qualities of hardness and resistance to scratching and solvents on the surface, makes this product very much used in the world of design.

Specifications:

- bathtub in methacrylate, a shock-absorbing material, resistant to heat, scratches, abrasions and water
- 2 mdf doors with rounded edges
- matte finish
- panel structure of melamine waterproof
- axis washing painted wood strips
- complete with drain siphon washing and ironing washing
- siphon attack: 35 from the floor to the washrooms, 39 cm insertion machine
- height 84 cm
- width 75 cm
- depth 60 cm
- Italian product

The colored versions of the sides are white.
