

## Washable cotton transfer sheet h23906

Transfer sheet with hooks for bed attachment. Externally cotton-lined. Transfer capacity: 250 Kg. Dimensions: 190 x 90 cm.

**The transfer sheet** facilitates side rotations and patient repositioning in bed, both independently and with the help of an operator. The surface of the sheet covers the patient's entire body, from head to toe, in such a way as to allow uniform and complication-free transfer. Furthermore, it can be **fixed to the bed using special hooks** sewn onto the edge of the sheet and, being padded, very wide, soft, and comfortable, it can be left permanently fixed to the bed, thus avoiding further handling of the patient during removal of the sheet. The simplest way to remove the sheet is to pull the bottom part of it and, taking advantage of the smooth lining, it will slide out without creating physical strain for the operator. The transfer sheet is **covered in cotton** on the outside while its interior is made of ULF, making the sheet **machine washable at 40°C**.

### Technical features:

- Material: cotton and ULF (ultra low friction)
- Equipped with hooks for bed attachment
- Dimensions: 190 x 90 cm
- Transfer capacity: 250 Kg
- Suspension capacity: 160 Kg
