

## Waste baler h980\_01

Compact and efficient waste baler, ideal for environments with limited space. Equipped with automatic bale ejection, intuitive control panel and low noise level. Dimensions: W 97.5 x D 71.5 x H 198.5 cm.

The **h980\_01 waste baler** is an efficient solution for reducing waste volume, ensuring **order, cleanliness and greater sustainability** in work environments.

Thanks to its **compact design**, with **small footprint and limited height**, it is perfect for placement in **tight spaces**, without sacrificing **powerful pressing force**. The **automatic bale ejection** system allows for safer and faster disposal management, while the **intuitive control panel** simplifies operations.

Equipped with an **automatic full-load indicator light**, it allows you to optimize usage times and reduce interruptions. Furthermore, the **low noise level** makes it suitable for any work environment, without disturbing personnel.

The structure is made with a **powder coating** that guarantees **greater durability over time**, resistance to corrosion and ease of cleaning. It works with a **230V single-phase power supply**, making it versatile and easy to install in different types of businesses.

Make waste management in your business more efficient! Order the **h980\_01 waste baler** now or request a personalized quote for your company!

### Technical characteristics:

- **Baler dimensions:** W 97.5 x D 71.5 x H 198.5 cm
- **Compacted bale dimensions:** W 770 x D 500 x H 600 mm
- **Loading aperture:** W 770 x D 460 mm
- **Weight:** 300 kg
- **Motor:** 1.5 kW
- **Power supply:** 1x230V 50Hz 10A
- **Compaction cycle duration:** 28 seconds
- **Cylinder stroke:** 650 mm
- **Number of ties:** 2
- **Tying type:** Twine
- **Bale ejection:** Automatic
- **Full load indicator:** Yes

### User benefits:

- **Space saving:** compact design, perfect for environments with limited space.
- **Waste volume reduction:** allows for storage optimization and reduced disposal costs.
- **Ease of use:** intuitive control panel with front controls for immediate use.
- **Safe bale ejection:** thanks to the two-hand control system, the operator works in total safety.
- **Low noise level:** ideal for use in closed environments without disturbing personnel.
- **Resistant structure:** powder coating for durability over time and resistance to external agents.

## FAQ:

### 1. Which materials can this baler compact?

The baler is suitable for cardboard, flexible plastic, paper and other light materials, excluding wet or hazardous waste.

### 2. Is the baler easy to install?

Yes, thanks to the 230V single-phase socket it can be easily connected without the need for industrial systems.

### 3. How is the bale ejected?

Ejection is automatic and takes place via a two-hand control system for maximum safety.

### 4. How long does a compaction cycle last?

The cycle lasts 28 seconds, ensuring speed and efficiency.

### 5. Is the machine noisy?

No, it is designed for a low noise level, ideal for indoor environments.

## Mini buying guide:

If you need to **optimize waste management** in your business without taking up too much space, the **h980\_01 waste baler** is the ideal choice. Thanks to its **compact dimensions** and **powerful pressing force**, it allows you to **efficiently reduce waste volume**, facilitating storage and disposal.

It is perfect for companies, shops, hotels, restaurants and businesses that generate large quantities of waste cardboard, plastic or similar materials. The **automatic bale ejection** system and **intuitive control panel** make it simple and safe to use even for operators without experience.

Investing in a **waste baler** means **reducing management costs, improving corporate sustainability and maintaining a cleaner and more orderly work environment**.
