

Waste battery bin 22 lt h326_44

Small cylindrical container useful for the collection of spent batteries. Capacity 22 lt, height from the ground 82 cm.

Plastic container for the collection of used batteries; it is an ideal solution for offices, shops, tobacconists, shopping centers, schools etc..

A 15/10 stainless steel sheet is fixed to the upper part of the cylinder, where an 8x4 cm hole has been created in the center to allow the different types of batteries on the market to be deposited inside.

Easy to empty by unscrewing the locking screws of the stainless steel sheet. The container is perfectly watertight.
