

Waste bin for public spaces in wood h763_40

40L circular bin in composite wood and galvanized steel. Functional design for urban decor and public space cleanliness.

The **h763_40 waste bin** is a solution designed for maintaining urban decor in public contexts and green areas. Thanks to the combination of **composite wood** and **galvanized steel sheet**, the product responds to the operational need to manage daily waste disposal while ensuring long-term durability. Designed for municipalities, parks, and accommodation facilities, it solves the problem of environmental degradation by offering an orderly collection point resistant to weathering agents, integrating harmoniously into the landscape thanks to the natural wood finish.
