

Waste bin with front door h215_206

Stainless steel waste bin with pedal lid, opening front door and wheels. Capacity 100/130 L. Ideal for HoReCa and collective catering.

The stainless steel waste bin is a solution designed for high-volume waste environments such as pizzerias, canteens and fast-food restaurants. It allows for hygienic and effective waste organization while maintaining order in the kitchen and service areas. The fully **stainless steel** structure guarantees resistance to corrosion, durability over time and ease of sanitization, essential requirements in food environments.

The operational design combines practicality with maintainability: the **pedal-operated lid** allows for hands-free waste disposal, while the **front door with closing system** permits complete access to the interior for deep cleaning. The **integrated wheels** facilitate movement even in tight spaces.

Technical features

- Material: stainless steel
- Capacity: bags of approximately 100/130 L
- Pedal-operated lid
- Front door opening at 90°
- Door closing system
- Wheels for mobility
- Dimensions: W. 370 × D. 560 × H. 890 mm
