

## Waste bin with wooden slats 86 liters h10967

Concrete and wooden slat waste bin ideal for outdoor areas. Equipped with internal container with handles for extraction.

The waste bin consists of a sturdy metal structure with curved front panels formed by flat inserts, fixed by screws to the two **concrete conglomerate sides** (composed of cement and washed river aggregate).

The internal container is made of **galvanized and painted sheet metal** provided with side handles for extraction.

It is covered with **wooden slats**.

It can be supplied with a top lid.

All metal parts are hot-dip galvanized according to UNI standards and powder-coated with thermosetting polyester according to various Ral shades. All screws are made of stainless steel.

Very robust, it is suitable for places where it cannot be fixed to the floor.

### Technical features:

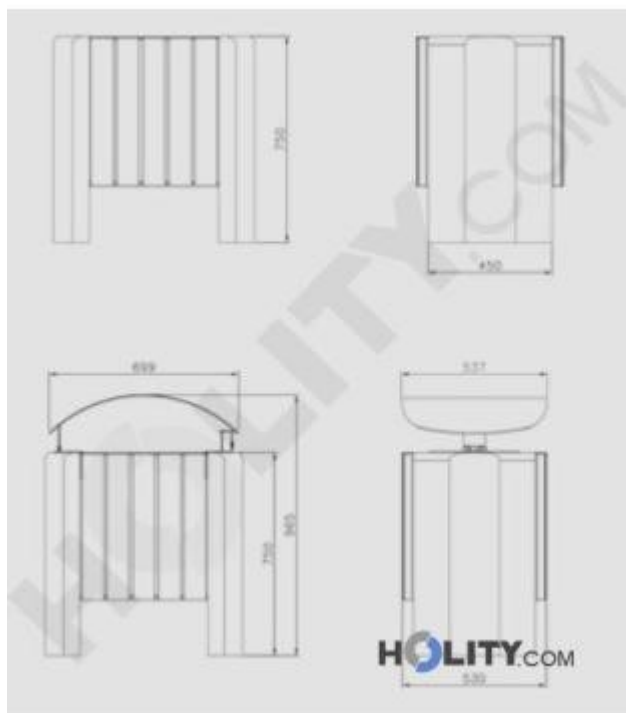

- External metal structure
- Internal container in **galvanized and painted sheet metal**.
- **Concrete** sides
- **Wooden slats**.
- **Dimensions:** 730 X 540 mm
- **Height:** 750 mm
- **Weight:** 190 kg
- **Capacity:** 86 liters

### Available types:

- Without lid
- With lid and ashtray

## INFORMATION

- **warranty** 2 anni
- **punti di forza** con coperchio
- **Typology** removable
- **fixing** from the ground
- **Capacity** 86 lt
