

Waste collection bin h220_399

Professional stainless steel bin, 59x50x95.5 cm, with pedal opening and braking wheels, ideal for healthcare hygiene and catering.

This professional waste management support is designed specifically for contexts that require high standards of hygiene and operational practicality, such as **hotels, hospitals and laboratories**. The structure, made entirely of **stainless steel**, guarantees superior resistance to corrosion and intensive cleaning cycles, ensuring long-lasting durability.

The system is characterized by a hybrid architecture that combines stability and mobility: the two adjustable feet allow the structure to be leveled on irregular surfaces, while the **swivel wheels equipped with brakes** allow for easy and safe movement even when the bag is fully loaded. The integration of the pedal allows for waste disposal without manual contact, optimizing workflows and biological safety.

Technical features

- **Structure material:** stainless steel
- **Opening system:** pedal mechanism
- **Base configuration:** 2 swivel wheels with brake and 2 adjustable feet
- **Fixing system:** elastic strap with locking mechanism for odor containment
- **Dimensions:** W. 59 x D. 50 x H. 95.5 cm
- **Weight:** 4.2 kg
- **Configuration:** version without rigid lid

Garbage bags are not included in the supply.
