

## Waste collection bin with hole h684\_147

Design waste bin in laminated wood with top hole, height 75 cm. Ideal for fast food and schools, customizable and modular in islands.

The **waste collection bin with hole h684\_147** has been designed to transform a purely functional element into a discreet and refined furnishing accessory. This model solves the operational problem of waste management in spaces open to the public, where aesthetics must necessarily coexist with efficiency. Thanks to its **height of 75 cm**, the waste bin is particularly suitable for a young target, facilitating waste disposal by children in school or recreational contexts.

Made of high-resistance **laminated wood**, the structure offers superior durability in HoReCa and fast food contexts, resisting the stresses of intensive use. Versatility is one of the product's strengths: it is possible to place several modules side by side to create true **recycling stations** (for example in combination with the h684\_148 model), customizing the color finish or adding company logos for perfect integration with the customer's brand.

## Technical features

- **Material:** Laminated wood available in different colors
- **External dimensions (W1 x D x H):** 550 x 600 x 750 mm
- **Internal compartment dimensions (W2 x D x H):** 1268 x 623 x 910 mm
- **Net Weight:** 70 Kg
- **Configuration:** Top hole for quick waste insertion
- **Modularity:** Designed for placement alongside other modules
- **Customization:** Logos, front/side plinths and labels (on request)

*\* Images for illustrative purposes only*

*\* On request and subject to a quote, the bin is customizable with logos; a front/side plinth and waste labels can also be added*

## INFORMATION

- **Height in millimetres** 750.000000
- **Width in millimetres** 550.000000
- **Depth in millimetres** 600.000000
