

Waste mineral oil collection container h1001_03

1100 lt container for used oil, in LLDPE with filter drainer and double tank. Dimensions: Ø 135 x H 127 cm.

The **waste oil collection container H1001_03** is the ideal solution for the compliant and safe management of **large quantities of waste lubricating oils**, both **mineral and synthetic based**, used in combustion engines, transmission systems, hydraulic systems, turbines and industrial machinery. With a **capacity of 1100 liters**, it is designed for use in **mechanical workshops, logistics centers, maintenance companies and production plants**, where safe storage is a priority.

The structure is made of **high-density linear polyethylene (LLDPE)**, resistant to chemical and atmospheric agents. The container consists of **two tanks**: an **internal one** to contain the product and an **external one** serving as a **safety tank** for any leaks, complying with the highest environmental safety standards.

It is equipped with a **built-in filter drainer**, useful for draining oils contained in used filters, an **oil discharge mouth with a threaded lid**, a **visual level indicator** and a **special warning light for leaks**, for complete and constant control of the content.

The black external color with a yellow interior facilitates visual inspection and the identification of any residues or contamination. The product **complies with Legislative Decree 27 January 1992, n. 95**, which implements directives **75/439/EEC** and **87/10/EEC** on the disposal of waste oils.

Recommended installation: on a **flat surface**, in a **covered place protected from sunlight**, to ensure the durability and integrity of the container over time.

Choose safety and regulatory compliance with the **1100 lt H1001_03 container**. Ideal for high-volume industries and workshops. Contact us now for a personalized quote!

Technical features:

- **Material:** High-density linear polyethylene (LLDPE)
- **Capacity:** 1100 liters
- **Structure:** Double tank (containment + safety)
- **Filter drainer:** Built-in
- **Oil discharge:** Mouth with threaded lid
- **Indicators:** Visual level + leak warning light
- **Color:** External black – internal yellow
- **Dimensions:** Ø 135 x H 127 cm
- **Installation:** On a flat, covered surface and protected from the sun
- **Regulation:** Complies with Legislative Decree 27/01/1992 n.95 and directives 75/439/EEC and 87/10/EEC

User benefits:

- **Capacity:** high for waste oil collection in industrial environments.
- **Double:** safety against accidental leaks.
- **Monitoring:** simple with integrated visual indicators.
- **Filter drainer:** for the safe treatment of used filters.
- **Construction:** robust, resistant to chemical and atmospheric agents.

FAQ:

1. What oils can I collect with this container?

Waste mineral and synthetic oils from engines, industrial plants, turbines, transmissions and used filters.

2. Can the container be used outdoors?

Installation in a covered area, on a flat surface and protected from sunlight is recommended.

3. Does it comply with Italian and European environmental regulations?

Yes, it complies with Legislative Decree 27 January 1992 n. 95 and EU directives 75/439/EEC and 87/10/EEC.

4. How is the oil level checked?

By means of an integrated visual indicator and leak control warning light.

5. Is it suitable for large-scale industrial use?

Yes, with a capacity of 1100 liters it is perfect for workshops, plants and companies with high consumption of lubricating oils.

Mini buying guide:

For companies with high consumption of **industrial lubricants**, it is essential to have safe, large-capacity and **certified** containers.

The H1001_03 **1100 liter** model, thanks to the **double tank, control indicators** and **built-in filter drainer**, offers **professional and compliant management** of used oils.

It ensures environmental protection, traceability of the content and operational safety, and is perfect for installations in **complex industrial environments**.

1100 liter waste oil collection container, double tank industrial oil tank, oil container with filter drainer, CE used oil collector, LLDPE container for industrial waste oils.
