

Waste oil collection tank 300lt h466_05

Waste oil collection tank made of polyethylene and UV resistant. Capacity 300 lt.

Waste oil disposal container made of rotomoulded high-density **polyethylene**, which guarantees maximum resistance to U.V. rays and atmospheric agents, making it perfect for outdoor placement.

The **waste oil collection tank** is designed to contain any leaks in compliance with environmental regulations as required by current standards.

The container with a **capacity of 300 lt** is equipped with a **hinged lid** at the top and a **filter drainage tray** inside the lid.

Oil suction inlet equipped with a Ø125 mm threaded cap.

The **visual level indicator** makes the product easy and intuitive to use.

Technical features:

- Waste oil container
- Nominal capacity: 300 lt
- Hinged lid at the top
- Filter drainage tray inside the lid
- Oil suction inlet equipped with a Ø125 mm threaded cap
- Visual level indicator
- Interstitial space monitoring indicator for leak detection
- Declaration of conformity
- Dimensions: Ø 820 mm-height 1080 mm
- Weight: approx. 30.5 Kg

INFORMATION

- **Typology** per olio usato
- **Capacity** 300 litri
- **Height in millimeters** 1080.000000
