

Waste recycling container h20_130

Fireproof waste bin for waste management with colored lid. Capacity 50 lt.

Small black epoxy powder-coated metal bin with a choice of colored lid to **encourage waste sorting** inside offices, schools and workplaces.

It is possible to create recycling stations by purchasing waste bins with lids of different colors. According to current regulations, the color/waste association is as follows:

- grey: unsorted waste
- blue: paper and cardboard
- yellow: plastic
- red: metal
- green: glass

The item is **fireproof** certified by CNPP; it has a flame-extinguishing head to block propagation. The base is made of scratch-resistant rubber.

Technical features:

- Material: steel
- Finish: textured coating
- Dimensions: diameter 335 mm x height 585 mm
- Opening: 140 mm
- Container weight: 4 kg

INFORMATION

- **Height in millimeters** 585.000000
- **Capacity** 50 lt
- **Material** Steel
