

Waste separation bin h438_297

9-liter bin for waste separation with 3 compartments in painted steel and non-slip base. Dimensions: Ø 257 x H 312 mm.

The **waste separation bin for hotel rooms h438_297** is an elegant accessory designed to facilitate waste sorting in spaces such as hotel rooms, offices, or common areas. With a capacity of **9 liters** divided into **three distinct compartments**, this bin allows for easy waste separation, promoting sustainability without sacrificing design. The **black painted steel structure** gives the bin a modern and discreet look, perfect for integrating into any refined environment, while the **non-slip base** ensures stability and safety.

The internal containers are made of **durable ABS** and are divided into three colors (black, blue, and green) to facilitate waste separation in a practical and visual way. The compact dimensions of the bin make it ideal for use in limited spaces, while still maintaining a good capacity for daily waste management. The black finish adds a touch of minimalist elegance that fits perfectly in modern environments, while maintaining a high level of functionality.

Add a touch of elegance and practicality to your spaces with the **h438_297 recycling bin** for waste separation. With its modern design and three distinct compartments, it is ideal for promoting sustainability in hotels, offices, and professional environments. Order today to improve waste organization and promote ecological management.

Technical features:

User benefits:

- Elegant and modern design that integrates into any environment
- Easy waste separation thanks to the three colored compartments
- Robust and resistant painted steel structure
- Non-slip base to prevent sliding on smooth surfaces
- Compact, perfect for small spaces like hotel rooms or offices

FAQ:

1. **Is the bin easy to clean?**
Yes, the internal ABS containers are easy to remove and clean, ensuring quick and simple maintenance.
2. **What is the capacity of each compartment?**
The total capacity of the bin is 9 liters, equally divided among the three compartments to facilitate waste separation.
3. **Is the bin suitable for outdoor use?**
No, this model is mainly designed for indoor use, in environments such as hotel rooms, offices, or common areas.
4. **Is the non-slip base removable?**
No, the non-slip base is integrated into the structure to ensure constant stability.

Mini buying guide:

Choosing a **waste separation bin** requires attention to details such as the **number of compartments**, to ensure it is adequate for your needs. Robust materials, such as **painted steel**, offer durability and a modern look, while the presence of **colored containers** facilitates waste separation in an intuitive way.

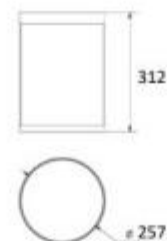

The **non-slip base** is a must to prevent unwanted movement, especially on smooth surfaces, and a compact bin like the **h438_297** fits perfectly into small spaces while maintaining high functionality.

Hotel waste separation bin, bin with separate compartments, office wastebasket, black painted steel bin, waste separation bin with non-slip base, modern hotel bin, 9-liter bin with three compartments.
