Waste sorting container with lid h42410

Waste collection container suitable for indoor environments. Equipped with a lid and three bins. Total capacity: 45 lt

Dimensions: 357 x 619 x h410 mm

The recycling bin is a necessary item to be used even in indoor environments in order to keep them clean from waste.

The product is ideal for being placed **inside** offices, cinemas, gyms, and various types of buildings that intend to operate with respect for the environment.

The container consists of **three bins with a capacity of 15 lt** each. The name of the waste shown on the bins makes the function of each of them intuitive.

The **internal buckets** are made of polypropylene and are **washable** and **removable**, facilitating emptying and maintenance activities for the product.

The container is made of **hot-dip galvanized steel** with a finish of heat-treated polyester powder coating.

The product is **equipped with a lid** that allows covering the bins with waste inside them.

The product's stability is enhanced by the presence of **rubber feet**.

On request and subject to a quote, the product can be made for a different number of waste types.

Technical features:

- Recycling bin
- Indoor use
- Material: galvanized steel
- Finish with heat-treated polyester powder coating
- With lid
- Total capacity: 45 lt
- 3 bins: 15 lt
- Removable polypropylene buckets
- Dimensions: 357x619x h410 mm
- Weight: 11.4 kg
