

Waterproof foam physiotherapy mat h731_65

Professional roll-up mat in closed-cell foam, 185x60x1.5 cm. Shock-absorbing and waterproof for physiotherapy and rehabilitation.

The **professional roll-up mat** is designed to meet the specific needs of physiotherapy centers, rehabilitation studios, and chirotherapy clinics. The structure is made of a **special closed-cell foam**, designed to provide a working surface that combines operational stability and patient comfort. Thanks to the mechanical properties of the material, the support ensures a high **damping power**, protecting the joints during the execution of therapeutic exercises and preventing the body from slipping.

The waterproof nature of the polymer prevents the absorption of liquids, sweat, and organic residues, making the mat a hygienic and long-lasting solution. The elastic resistance allows the mat to maintain its original thickness of 1.5 cm even after intensive and prolonged use.

Technical features

- **Dimensions:** 185 x 60 cm
- **Thickness:** 1.5 cm
- **Weight:** approx. 2.2 kg
- **Material:** technical closed-cell foam
- **Properties:** anti-slip, elastic, shock-absorbing
- **Hygiene:** washable by immersion, resistant to bacteria and fungi
- **Certification:** Compliant with CE 93/42/EC (Medical Devices)
- **Standard color:** blue
