

Wheeled bucket with drain taps h422_52

Cleaning bucket with wheels, two drain taps and wringer.

30 L wringer bucket in **shockproof plastic material** with **two drain taps**, used for professional floor cleaning of medium to large environments. Made with non-toxic and **fully recyclable** polypropylene copolymer components. Greater height compared to traditional single-tank buckets to allow the operator to always work in an upright position. Consisting of **two compartments (16+14 L)** for a clear separation of rinse water from the detergent solution, thus ensuring professional floor cleaning, obtaining better washing results, greater hygiene, product savings, less work time and less operator effort. Equipped with a **double drain tap**, which allows water to flow out from both compartments without having to lift the bucket. Double plastic handle for correct balance and maximum stability during transport. Down-press wringer ideal for cleaning systems. **Removable rear feet** that allow for bucket stacking, screen printing on both sides of the bucket with a drawing indicating "caution wet floor".

Technical features:

- Material: polypropylene copolymer
- Capacity: 30 liters
- 2 drain taps
- Stackable
- Two compartments 16+14 liters
- With wheels
- Dimensions: W.60xD.40xH.93 cm

INFORMATION

- **Typology** Secchio per pulizia
- **Strengths** Secchio singolo
