

Wheeled walking frame for outdoor use h13653

Four wheeled walking frame for outdoor use, equipped with height-adjustable handgrips, loop brakes, leather seat, back band and caddy.

Those who need extra support to walk will find this walking frame surprisingly helpful. The device is very **light and maneuverable**. It has got **four wheels**: two front **swivel castors** and fixed rear ones. The rear wheels are equipped with loop brakes which ensure **stability and security**. The considerable size of the wheels is useful to **outstep every obstacle** you'll find on your way.

The handgrips, soft and anatomically shaped, are **height adjustable**.

The **leatherette seat** and the **back band** allow the user to sit safely when tired. If you need to fold the walker, you'll only have to pull a stripe placed right above the seat. The low weight of the walker, its compact size and its structure make it **easily transportable**.

The device is equipped with a large **storage basket**, foldable with the walker. **Reflective** patches ensure visibility during dark hours.
