

White concrete bollard for urban furniture h319_138

High-strength white concrete bollard, 450x450x450 mm. Travertine-effect finish and internal iron reinforcement for safe urban furniture.

The **white concrete bollard** represents an advanced structural solution for the management and protection of public and private spaces. Designed to delimit pedestrian areas, limited traffic zones and parking lots, this element combines mechanical solidity with refined aesthetics. The structure is made of **high-strength white concrete**, integrated with internal iron reinforcement with continuous wire and improved grip, which ensures stability and prolonged resistance to wear. The surface finish with a **travertine effect** gives the product a natural and elegant appearance, ideal for integration into both modern and historical architectural contexts.

The compact cubic dimensions allow for strategic positioning to control vehicle flows without obstructing visibility. The design is characterized by **rounded corners**, a fundamental technical choice to increase passive safety, reducing the risk of damage to pedestrians or vehicles in case of accidental contact. The product is designed to stably resist impacts and weathering, maintaining performance properties unchanged over time. The product is fully compliant with the **Minimum Environmental Criteria (CAM)** for urban furniture.

Technical features

- **Material:** High-strength white concrete
- **Reinforcement:** Continuous wire iron with improved grip for structural stability
- **Finish:** Natural travertine effect
- **Dimensions:** 450 x 450 x h 450 mm
- **Resistance:** High durability against atmospheric agents and freeze-thaw cycles
- **Safety:** Profile with rounded anti-trauma corners
- **Sustainability:** Compliance with minimum environmental criteria (CAM)
- **Installation:** Integrated setup for ground fixing

INFORMATION

- **Material** cemento
- **reflective band** no
- **Diameter** 450.000000
- **fixing** da appoggio
- **Typology** Senza anelli
- **Height in millimetres** 450.000000
