

White sanitary napkin dispenser for public restrooms h224_17

Menstrual hygiene dispenser in painted stainless steel, 20x10x31 cm. Double compartment for high-capacity tampons and pads. The **H224_17 dispenser** is a professional dispenser designed for the discreet and functional management of menstrual hygiene in high-traffic settings. Made of **stainless steel with a white powder-coated finish**, the device ensures high mechanical resistance and easy sanitization of surfaces. The internal double-compartment configuration allows for optimizing the simultaneous storage of tampons and pads, effectively solving issues related to clutter and stock shortages in collective restrooms.
