

White urban street furniture bench h338_47

White urban street furniture bench with photocatalytic surface. Dimensions: L 200 x D 40 x H 45 cm.

The **H338_47 urban street furniture bench** is an innovative solution that combines **urban design, functionality, and environmental sustainability**. Made with a **special photocatalytic mixture**, this bench actively contributes to the **reduction of pollutants in the air**, transforming public spaces into healthier and more environmentally conscious environments.

Ideal for **parks, squares, avenues, green areas, pedestrian spaces, and limited traffic zones**, it is designed to fit harmoniously into modern or minimalist contexts, thanks to its **pure white color**, the only one available for this model.

The surface does not feature an **anti-graffiti finish**, a characteristic that makes it more suitable for **monitored areas or residential and redeveloped areas**, where aesthetics and environmental impact are a priority. With a **length of 200 cm**, it comfortably accommodates several people, while the **massive 550 kg structure** guarantees **stability, resistance to vandalism**, and no need for permanent fixing.

This bench represents a concrete choice for those who want to **redevelop public spaces** with durable solutions with **high environmental value**.

Choose sustainability for your urban project: order the **H338_47 bench** with photocatalytic surface now and help improve air quality.

Technical features:

- **Material:** Photocatalytic mixture
- **Dimensions:** L 200 x D 40 x H 45 cm
- **Color:** White (only available)
- **Finish:** Without anti-graffiti treatment
- **Weight:** 550 kg
- **Installation:** Self-standing, no fixing required
- **Use:** Urban street furniture, public areas, green projects

User benefits:

- **Contributes:** to the reduction of air pollution.
- **Design:** modern and minimalist, ideal for elegant urban areas.
- **Structure:** massive, stable, and resistant to vandalism.
- **None:** installation required thanks to the self-standing weight.
- **Solution:** ecological for sustainable redevelopments.

FAQ:

1. **What does photocatalytic material mean?**
It is a material that, when exposed to light, breaks down air pollutants, improving air quality.
2. **Is it available in other colors?**
No, it is only available in white, without an anti-graffiti finish.
3. **Does it need to be fixed to the ground?**
No, thanks to the weight of 550 kg, it is self-standing and very stable.
4. **Is it suitable for areas subject to vandalism?**
As it has no anti-graffiti finish, installation in monitored or residential areas is recommended.
5. **What is the capacity of the bench?**
With a length of 2 meters, it can comfortably accommodate 3 - 4 people.

Short buying guide:

For urban projects oriented towards **environmental sustainability**, benches made of **photocatalytic materials** represent a forward-thinking choice.

They offer **traditional functionality** with an added value: the **ability to reduce air pollution**.

When evaluating the purchase, it is also useful to consider the **location**: for models without anti-graffiti finishes, installation in **monitored** or low vandalism risk areas is recommended.

Finally, the **minimal design and neutral coloring** make these benches perfect for contemporary urban environments.

Photocatalytic urban street furniture bench, sustainable white bench, ecological urban bench, 200 cm bench for public spaces, anti-pollution street furniture, self-standing bench in innovative material.
