

Wooden bench for public spaces with backrest h773_31

Urban furniture bench made entirely of pressure-treated pine, with backrest. Dimensions: L 200 x D 54 x H 85 cm.

The **wooden bench with backrest for urban furniture H773_31** is a functional and sustainable solution for the layout of **outdoor public spaces** such as **parks, avenues, green areas, school yards and pedestrian paths**. Made **entirely of pressure-treated glulam and solid pine wood**, a durable and weather-resistant material, it combines **sturdiness, comfort and a natural design** easily integrable into urban or landscape contexts.

Thanks to the **autoclave treatment**, the pine used effectively resists rain, sun, humidity, fungi and insects, ensuring a **long duration over time** without the need for frequent maintenance. The **ergonomic profile of the seat** and the **85 cm high backrest** offers an excellent level of comfort for the user, making it ideal even for prolonged stays in public relaxation areas.

The **linear design** and the absence of visible metal supports enhance the natural aesthetics of the wood, making it perfect for installations in green, school or recreational environments. The structure is solid and stable, designed to withstand frequent use and daily stresses.

Choose a solid, elegant and environmentally friendly wooden bench. Order the **H773_31 bench** today or request a quote for public or contract supplies.
