

## Wooden bin for public spaces h34629

Urban bin in Scandinavian pine and galvanized steel, 80L capacity with concrete base. Ideal for aesthetic integration in parks and green areas.

The **H34629** bin is a technical solution designed for waste management in outdoor environments that require high urban decorum. The structure combines the solidity of **hot-dip galvanized steel** with the natural aesthetics of **Scandinavian pine wood**, making it suitable for placement in parks, historical centers, squares, and cycling paths. The configuration includes systems to facilitate maintenance operations and ensure maximum stability in high-traffic contexts.

## Technical features

- **Supporting structure:** Internal frame in hot-dip galvanized steel sheet, minimum thickness 3 mm.
- **Cladding:** Scandinavian pine wood boards with pressure impregnation treatment.
- **Slat dimensions:** Minimum section 3.5 x 9.5 cm, fixed with stainless steel screws.
- **Opening system:** Powder-coated steel upper ring, hinged for easy access.
- **Internal container:** High-density grey PVC bin, 80-liter capacity.
- **Bag management:** Removable bag holder ring included.
- **Stability:** Reinforced concrete base with a diameter of 55 cm.
- **Overall dimensions:** Ø 55 cm x height 89 cm.
- **Installation:** Designed for anchoring on recommended foundations of 25 x 25 x 40h cm.
