Wooden examination or massage table h930_46

Professional beech wood table, 2000x700 mm, 240 kg load capacity. Adjustable headrest up to 35° for medical, physiotherapy, and aesthetic treatments.

The **h930_46 table** is a professional device designed to provide a stable and highly resistant support surface, optimized for performing **medical, physiotherapeutic, and aesthetic treatments**. The main frame is entirely made of **wood with a beech finish**, a solution that combines mechanical durability and natural aesthetics, ideal for professional studios, clinics, and wellness centers looking for a welcoming environment without compromising technical performance.

Ergonomics is guaranteed by a **fixed height of 76 cm**, designed to allow the operator to maintain a correct posture during sessions, reducing muscle fatigue. Patient comfort is provided by **thin foam padding**, which offers the necessary support for physiotherapeutic maneuvers and massages, combined with a **head section adjustable up to 35°** to facilitate positioning according to the type of examination or treatment.
