

Wooden multi-play composition h575_98

Multi-play composition with towers, swing, slide. Recommended age: 2-8 years

Multi-play composition dedicated to children (2-8 years) that encourages socialization and promotes fun. The complex is characterized by the presence of **two towers, with platforms placed at two different heights** (h 90 cm and h 120 cm), connected to each other with an uphill passage. The structure is made with 90x90 mm laminated Nordic pine poles, with rounded corners (r. 10mm). It is equipped with a **perforated sheet metal roof**, platforms and steps made of embossed sheet metal to ensure high slip resistance, and colored HDPE balustrades. The tower is equipped with a **straight rotational polyethylene slide** h 120 cm and a single-seater swing.

Technical characteristics:

- Structure material: wood
- Recommended age: 2-8 years
- Overall dimensions: 646x426xh.330 cm
- Safety area: 895x806 cm
- Max drop height: 133 cm
- Safety surfacing: 54.2 sqm
- Max number of users: 3+
- Slide
- Climbing ladder
- Slide
- Swing
