Wooden notice board for mountains h575_64

Notice board with heat-treated pine roof, 150 x 100 cm birch panel and post mounting. Overall dimensions 198 x 46.5 x 235.7 cm.

The **outdoor notice board with heat-treated pine wood roof** is an information structure designed for setting up nature trails, mountain paths, and hilly landscapes. It allows for the provision of a point for displaying communications and information material for visitors.

The structure is made with **heat-treated pine wood posts and boards** and includes a covering roof. It is supported by **2 glulam posts with rounded corners**, each measuring **90 x 90 x 2245 mm**, equipped with **powder-coated brackets for ground anchoring**.

The display surface consists of **1 phenolic-glued birch plywood panel**, **16 mm** thick, impregnated for outdoor use. The panel measures **150 cm in width and 100 cm in height** and is intended for posting notices and information.

The notice board also includes **7 heat-treated pine boards with rounded corners**, each measuring **95 x 35 x 1980 mm**.

The fastening elements, including screws, nuts, and washers, are protected by **polyethylene rings and caps**. The original documentation contains two different indications for the material of the fixings: galvanized steel in the component description and stainless steel in the list of technical characteristics. The specification must therefore be verified before purchase.

The notice board has overall dimensions of **1980 x 465 x 2357 mm** and is intended for installation on posts anchored to the ground.

Technical characteristics

- Product code: h575_64
- Type: outdoor information notice board with roof
- Structure material: heat-treated pine wood
- Panel material: birch plywood
- Pine wood treatment: heat treatment, replacing autoclave impregnation
- Number of load-bearing posts: 2
- Post type: heat-treated pine glulam
- Dimensions of each post: 90 x 90 x 2245 mm
- Post finish: rounded corners
- Anchoring brackets: powder-coated
- Number of display panels: 1
- Panel type: phenolic-glued birch plywood
- Panel treatment: impregnated for outdoor use
- Panel thickness: 16 mm
- Panel width: 150 cm
- Panel height: 100 cm
- Number of wooden boards: 7
- Board material: heat-treated pine
- Dimensions of each board: 95 x 35 x 1980 mm
- Board finish: rounded corners
- Fastening elements: screws, nuts, washers, and other assembly components
- Fastening elements material: galvanized steel according to component description; stainless steel according to the original technical list, to be verified

- Fastener protection: polyethylene rings and caps
- Configuration: with roof
- Installation system: post mounting with ground anchoring
- Overall width: 1980 mm
- Overall depth: 465 mm
- Overall height: 2357 mm
- Intended use: outdoor environments
- Availability: product also listed on the MEPA portal of the Public Administration

Note: Real product dimensions and weight may vary slightly from the indicated values.
