

## Wooden office desk h732\_09

Professional melamine wood desk 25 mm thick, wax finish. Dimensions: L 100 x D 80 x H 74 cm.

The **office desk H732\_09** is designed to ensure **functionality, durability and environmental sustainability**, offering an ideal solution for **executive offices, operational offices and smart working stations**. Made with **ecological wood conglomerate panels** with low formaldehyde content (class E1) and **fire reaction class 2**, it represents a safe and eco-sustainable choice.

The **worktops, legs and beams** are made of 25 mm thick panels, **coated with melamine resins** with an anti-glare wax finish, resistant to daily wear and easy to clean. The edges are finished with **high-resistance ABS** and **rounded corners**, for comfortable and safe use even in shared environments.

The fixing system using **threaded bushings** inserted into the panels allows **junctions exclusively between metal parts**, guaranteeing **greater stability** and the possibility of **disassembly and reassembly without damage**, ideal for dynamic companies or offices undergoing reorganization.

Thanks to its simple yet professional design, the desk fits perfectly into formal and modern contexts, while ensuring an ergonomic and long-lasting workstation.

Buy the **H732\_09 desk** now for your office or request a tailored offer to furnish multiple workstations with professional and sustainable furniture.

### Technical characteristics:

- **Type:** Indoor office desk
- **Structure material:** Wood conglomerate 25 mm thick
- **Coating:** Melamine resins with anti-glare wax finish
- **Color:** white
- **Edges:** High-resistance ABS with rounded corners
- **Formaldehyde class:** E1 (low content)
- **Fire reaction class:** 2
- **Fixings:** Threaded bushings for junctions only between metal parts
- **Disassembly system:** Simple and safe, without damaging the components
- **Dimensions:** L 100 x D 80 x H 74 cm
- **Ecology:** Recyclable ecological panels (disposable in dedicated landfills)

### User benefits:

- **Made:** with recyclable ecological panels.
- **High resistance:** and durability thanks to the melamine coating.
- **Design:** professional with anti-glare finish.
- **System:** intelligent assembly system for frequent disassembly without damage.
- **Corners:** rounded for greater safety in shared environments.

### FAQ:

**1. Is the desk easy to assemble?**

Yes, the fixing system with threaded bushings facilitates assembly and disassembly without damaging the components.

2. **Is the material resistant to heat or fire?**

It is classified as fire reaction class 2, therefore it offers a good level of resistance in professional environments.

3. **Are the edges safe for environments with multiple people?**

Yes, the edges are in ABS with rounded corners, ideal for shared environments and high-traffic stations.

4. **Is it also suitable for home offices?**

Certainly. The compact dimensions and sober design make it perfect also for home smart working.

5. **Is the product recyclable?**

Yes, it is made with an ecological panel and, if disposed of correctly, can be entirely recycled.

**Mini buying guide:**

When choosing a desk for professional use, always check the **material: melamine-coated wood conglomerate** is resistant, economical and easy to maintain.

Prefer products with **ABS edges** and **rounded corners**, both for safety and durability.

Another fundamental aspect is the **ease of assembly and disassembly**, particularly useful for dynamic work environments.

If you are looking for a sustainable solution, opt for **E1 certified ecological panels**, with low environmental impact and low levels of formaldehyde emissions.

The dimensions of 100 x 80 cm offer a large surface without taking up too much space, ideal even for small rooms.

*Ecological wood office desk, professional melamine E1 desk, desk with rounded ABS edges, dismountable office desk, 100x80 cm desk for workstation, sustainable office furniture, fire-retardant desk for work environments.*
