

Wooden outdoor waste bin h763_39

Outdoor waste bin made of high-quality natural teak wood, 60-liter capacity. Waterproof and ultra-resistant structure. Dimensions: W 49.8 x D 39.8 x H 80.5 cm.

The **outdoor wooden waste bin** in teak is a high-profile solution designed to preserve urban decorum and keep public spaces clean and welcoming. This element addresses the need for durable waste management through the use of **natural teak**, a dense and extremely resistant tropical wood. Thanks to its high concentration of oils and waxes, the bin offers natural protection against water, mold, and biological agents, ensuring a refined aesthetic that integrates perfectly into prestigious contexts without requiring constant maintenance.
