

Wooden planter for urban furniture h521_09

Rustic FSC-certified pine wood planter, 100x100x100 cm. Anti-parasitic treatment for parks, rural areas, and open spaces. The pine planter represents a technical-professional furnishing solution designed for harmonious integration into parks, public gardens, and complex landscape contexts. Thanks to its **rustic design** and generous volumetric structure, it meets the needs for durability and solidity required in high-traffic open spaces. The wood used is subjected to specific **industrial anti-woodworm and anti-termite treatments**, essential to prevent biological degradation caused by external agents and ensure long-term structural stability.

Technical features

- Dimensions: 100 x 100 x 100 cm
- Material: FSC-certified pine wood
- Treatment: Protective anti-woodworm and anti-termite impregnation
- Finish: Rustic for rural environments
- Supply state: Semi-assembled product for logistical optimization
