

## Wooden waste bin for ground fixing h140\_545

h140\_545 waste bin in galvanized steel and 50L Okumè wood. 53kg self-supporting structure with integrated ashtray for urban furniture.

The **h140\_545 waste bin** represents an advanced solution for urban furniture, designed to combine the mechanical resistance of steel with the aesthetic appeal of wood. Ideal for **parks, squares and pedestrian areas**, this element solves the need for efficient waste collection in contexts subject to high traffic and aggressive atmospheric agents. The heavy load-bearing structure and the certified painting cycle guarantee superior protection against corrosion, making it a durable investment for the public administration and the contract sector.

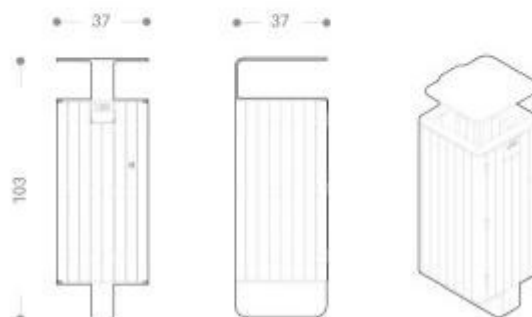

## Technical features

- **Dimensions:** 37 x 37 x h 103 cm
- **Capacity:** Internal container of approximately 50 liters
- **Weight:** 53 kg for high structural stability
- **Frame:** 8 mm thick laser-shaped galvanized sheet metal
- **Panelling:** 2 mm thick galvanized sheet metal
- **Cladding:** Okumè wood slats (40x20 mm section) specific for outdoor use
- **Opening system:** Front door equipped with safety lock
- **Waste management:** Removable internal container in galvanized sheet metal with ergonomic handles
- **Accessories included:** Integrated ashtray in the door with extinguishing holes
- **Finish:** RAL 3004HR (purple red) thermosetting powder coating with double polymerization
- **Anchoring:** Base prepared for ground fixing via anchor bolts
