Wooden waste bin for parks and gardens h140121

Waste bin with galvanized steel structure and wooden slats. Capacity 25 liters. Italian product.

Wooden and metal waste bin. Capacity 25 liters. Italian product.

The **nordic pine wood** slats have been processed on the four corners to obtain a bevel and give the bin a softer line. These slats cover the cylindrical shape of the bin made from galvanized sheet metal. The entire bin is supported by a round **galvanized steel** tube. The basic composition of the bin makes it suitable for environments such as **playgrounds** or **public gardens**.

Support post:

- in round galvanized steel tube, mm. Ø 60 x 2, complete with PVC end cap.

Basket:

- cylindrical shape made of galvanized sheet metal thickness 8 / 10; the basket is covered with 10 Nordic pine wood slats (sec. mm. 80 x 20), beveled at the four corners;
- galvanized steel sheet bottom with holes for rainwater drainage.

Emptying:

- by removing the bag (not supplied)

METAL STRUCTURE

- galvanized.

SLATS

- high-pressure autoclave impregnated with fluid salt concentrate. This treatment gives the slats **preventive protection against attacks by insects, fungi, and rot**. The slats undergo a cycle with colored impregnator and a final gloss finish for outdoor use.

Fixing:

- by extending the support post into the ground;
- the bin is supplied in an assembly kit.

Dimensions:

- height above ground cm. 100;
- part to be buried cm. 20;
- basket diameter cm. 31;
- basket height cm. 48;
- capacity lt. 25;
- weight kg. 12.
