

Wooden waste bin h922_06

25L waste bin in steel and EN351 certified wooden slats. Structure with oxiron primer for urban furniture and green areas. The **wooden and steel waste bin** is a solution designed for waste management in outdoor environments requiring durability and a harmonious design. The load-bearing structure, made of **tubular steel**, provides mechanical solidity, while the treated **wooden slat** cladding allows for optimal aesthetic integration in natural and urban contexts. Surface protection via grey **oxiron primer** ensures high resistance to impact and abrasion, preserving the integrity of the metal over time.

Technical features

- **Structure material:** tubular steel with grey oxiron finish
- **Cladding:** wooden slats compliant with EN351 and EN335 standards
- **Capacity:** 25 liters
- **Total dimensions:** W. 50.8 x D. 40 x H. 93 cm
- **Installation:** base prepared for ground anchoring via expansion bolts
- **Resistance:** scratch-resistant and high-adhesion finish
