

Work bench shelf capacity 600 kg h965_18

Professional work bench in steel and MDF (120x75 cm). 600 kg capacity and telescopic drawer, ideal for workshops without wall anchoring.

The **H965_18 work bench** represents a high-resistance operational workstation, designed for the typical stresses of mechanical workshops, production departments, and technical laboratories. The load-bearing structure in **epoxy-polyester powder-coated steel** ensures protection against corrosion and chemical agents, while the **35 mm MDF top** offers a solid and absorbent support surface for mechanical processing and precision assembly.

The freestanding configuration allows for flexible positioning within the work area, guaranteeing a **static capacity of 600 kg per shelf** without the need to drill walls for anchoring. The integration of a **drawer with telescopic slides** and scratch-resistant plastic feet optimizes ergonomics and preserves the integrity of industrial flooring.

Technical specifications

- **Overall dimensions:** W 120 x D 75 x H 86.5 cm
- **Top material:** High-thickness MDF (35 mm)
- **Structure:** Steel with blue epoxy-polyester finish
- **Shelf load capacity:** 600 kg
- **Total module capacity:** 635 kg
- **Assembly system:** Screw assembly (estimated time 15 min)
- **Standard equipment:** 1 drawer with telescopic slides, 4 protective feet
- **Installation requirements:** Freestanding, does not require wall mounting
