

Work bench with adjustable height h900_03

Industrial work bench in steel and 40mm solid beech. Capacity 1250kg, dimensions 150x70cm. Welded structure for workshops and factories.

This **professional work table** is designed to respond to the typical stresses of industrial contexts, guaranteeing an extremely rigid and durable supporting surface. The combination of the **40 mm solid beech top** and the steel square tube frame allows for the handling of heavy loads and mechanical processes that require absolute stability. The bench is delivered already assembled to ensure the structural integrity of the welding and immediate operability in production departments.

Technical features

- **Structure:** Supporting frame in square steel tube
- **Top surface:** Solid beech with 40 mm thickness
- **Finish:** Powder coating resistant to scratches and chemical agents
- **Storage:** Integrated lower shelf in beech wood
- **Load capacity:** Maximum static capacity of 1250 kg
- **Delivery state:** Product supplied already assembled
- **Dimensions:** W 150 x D 70 cm
- **Operating height:** Adjustable or preset between 84 and 104 cm
