

Work bench with metal top h965_24

Professional steel work bench with 180 cm metal top. 600 kg capacity and integrated security locker for industrial workshops. The **H965_24 work bench** is an operating station designed for industrial contexts, mechanical workshops and technical laboratories requiring **high load capacity** and wear resistance. The self-supporting steel structure ensures stability even during heavy processing, solving critical issues related to vibrations and mechanical stress typical of production environments.

The metal work top is designed to resist impacts, scratches and contact with oily substances, facilitating maintenance and cleaning operations. The integration of a **metal locker with lock** and a large lower shelf allows for optimal space organization, keeping equipment safe and close at hand.

Technical features

- **Total dimensions:** W 180 x D 73 x H 83 cm
- **Work top material:** High resistance metal
- **Main top load capacity:** 600 kg
- **Structure:** Steel painted with grey epoxy powders
- **Lower shelf:** Maximum capacity 300 kg
- **Integrated locker:** Metal, with lock, capacity 50 kg
- **Assembly system:** Kit with screw hardware for rapid assembly
- **Configuration:** Self-supporting, does not require wall anchoring
