

Work cage for forklifts for 1 person h935_03

Personnel basket for aerial maintenance. For 1 person. Dimensions: W. 910 x D. 860 x h. 2000 mm.

This **forklift work platform**, designed for **1 person**, is made of a **solid tubular structure** and powder-coated in the vibrant **pure orange RAL 2004** color, which ensures visibility and resistance to external agents. The rear part of the basket consists of a robust **wire mesh**, while the **side and front walls** are equipped with **tubular** fall protection, ensuring maximum safety during use. The **platform floor** is designed with a **non-slip surface** to guarantee stability, while the locking pin ensures a firm anchoring to the forklift. Furthermore, the basket includes a practical **tool tray**, ideal for simplifying work operations. Thanks to its compact design, this work platform is perfect for companies that rarely use this type of equipment. The basket **can be mounted on both counterbalance and reach trucks**, and its small dimensions facilitate space-saving storage when not in use.
