

## Work table h900\_09

Professional workbench with 40 mm solid beech top, adjustable height and 3 drawers. Load capacity 1250 kg, supplied already assembled.

High-capacity workstation designed for **mechanical workshops**, technical laboratories and production departments that require an extremely rigid and resistant work surface. The structure combines the durability of **solid beech** with the stability of a square steel tube frame, ensuring consistent performance even under heavy loads up to 1250 kg.

Ergonomics is at the heart of the design: the **height adjustment** system allows the top to be adapted to the specific needs of the operator and the type of work, reducing fatigue during prolonged shifts. The integration of three drawers on roller bearing slides ensures orderly and immediate management of manual instrumentation.

## Technical features

- **Structure:** High-thickness square steel tube load-bearing frame
- **Worktop:** Solid beech, 40 mm thickness, resistant to impact and compression
- **Adjustment:** Variable operating height from 84 to 104 cm
- **Storage:** 3 drawers mounted on roller bearing slides for smooth sliding
- **Load capacity:** Maximum static load 1250 kg
- **Overall dimensions:** L. 1500 x D. 700 mm
- **Delivery status:** Product supplied fully assembled and tested
