

Workbench h900_06

Professional solid beech workbench 200x70 cm with height-adjustable steel structure and 1250 kg capacity for mechanical workshops.

This **professional workbench** is designed to meet the needs of mechanical workshops, craft laboratories and production departments that require an extremely robust support surface. The **solid beech top** with a thickness of 40 mm guarantees excellent resistance to mechanical stress and compression, while offering a natural surface ideal for precision work. The supporting structure in **square steel tubing** ensures absolute stability even under heavy loads, while the possibility of **adjusting the height** allows the workstation to be adapted to the operator's ergonomic parameters or to the specific needs of the task to be performed.

Technical features

- **Worktop:** Solid beech with 40 mm thickness
- **Frame:** Electrowelded square steel tube structure
- **Top dimensions:** 2000 x 700 mm
- **Height adjustment:** Range from 840 mm to 1040 mm
- **Maximum capacity:** 1250 kg (uniformly distributed static load)
- **Organization:** 1 metal drawer mounted on roller bearing guides
- **Finish:** Scratch and chemical resistant powder coating
- **Supply status:** Product delivered already assembled and ready for use
