

Workbench h900_11

Professional solid beech workbench (150x70 cm) with 3 drawers, adjustable height and 1250 kg capacity. Robust and ready to use.

This **professional workbench** is designed to meet the needs of mechanical workshops, technical laboratories and garages requiring an extremely resistant and durable support surface. The load-bearing structure in **square steel tubing** guarantees stability even under heavy loads, while the **40 mm solid beech** worktop offers a solid and non-deformable base for manual and mechanical operations.

Ergonomics is a central point of the design: the **height adjustment** system allows the workstation to be adapted to the operator's height or the specificity of the task, reducing fatigue during long work sessions. Tool organization is facilitated by an integrated module including three high-smoothness drawers and a compartment with a hinged door, optimizing space and keeping equipment always at hand.

Technical characteristics

- **Worktop:** Solid beech, 40 mm thickness
- **Frame:** High-resistance square steel tube structure
- **Adjustment:** Variable working height from 84 to 104 cm
- **Storage:** 3 drawers on roller bearing guides
- **Bottom compartment:** 1 hinged door with height-adjustable shelf
- **Load capacity:** Maximum static capacity 1250 kg
- **Dimensions:** W. 150 x D. 70 x H. 84-104 cm
- **Assembly:** Supplied already assembled and ready for use
