

## Workbench h900\_14

Professional workbench with solid beech top, 9 drawers and height-adjustable frame. Load capacity 1250 kg, ideal for mechanical workshops.

This **professional workbench** is designed to meet the needs of mechanical workshops, maintenance laboratories and production departments requiring an extremely solid support surface and a methodical organization of tools. The structure integrates the mechanical strength of a **square tube frame** with the versatility of a variable height system, allowing the operator to configure the workstation according to specific activities or their ergonomic needs.

The wide **solid beech** top ensures high resistance to impacts and stresses, making it suitable for heavy processing. Storage capacity is entrusted to an integrated 9-element drawer unit, optimized by roller bearing guides for smooth sliding even under full load.

## Technical features

- **Structure:** Supporting frame in square steel tube
- **Worktop:** High-resistance solid beech
- **Adjustment:** Variable height from 84 to 104 cm
- **Storage:** 9 drawers on extractable guides with roller bearings
- **Load capacity:** Maximum static load capacity 1250 kg
- **Configuration:** Supplied fully assembled
- **Dimensions:** L 2000 x D 700 x H 840-1040 mm
