

Workbench with 1 shelf h965_22

Professional steel workbench, 120x73x83 cm. 600 kg load capacity and liquid-resistant metal top, ideal for workshops and laboratories.

The **H965_22 workbench** is a high-resistance workstation designed to ensure maximum stability in industrial and technical environments. The self-supporting steel structure and metal worktop offer a durable solution for those managing heavy loads or operating in contexts exposed to oils and corrosive liquids. Thanks to the **epoxy-polyester powder coating**, the bench maintains its structural integrity even under intensive mechanical stress and prevents oxidation.

Technical features

- **Dimensions:** W 120 x D 73 x H 83 cm
- **Worktop:** Steel with epoxy-polyester coating
- **Load capacity:** 600 kg per shelf/module
- **Configuration:** Single work shelf
- **Assembly:** Screw system (estimated time 15 minutes)
- **Stability:** Self-supporting structure, does not require wall fixing
- **Protection:** 4 non-slip plastic feet included
- **Finish:** Blue industrial coating
