

Workbench with drawer h965_05

Professional steel and MDF workbench (151x61 cm). 910 kg capacity, quick boltless assembly and integrated drawer with telescopic slides.

The **h965_05 workbench** is a high-performance workstation designed to meet the needs of mechanical workshops, maintenance laboratories, and industrial production departments. Thanks to the combination of a steel structure and high-density MDF shelves, the system responds to the need for an extremely stable work surface, capable of withstanding high static loads and continuous mechanical stresses.

The integration of the rear pegboard and the drawer with smooth slides allows for rational management of tools, reducing operational downtime caused by searching for tools or small parts. The three-level configuration optimizes vertical space while ensuring correct ergonomics for the operator.

Technical features

- **Total dimensions:** W 151 x D 61 x H 144.5 cm
- **Load capacity per shelf:** 600 kg (uniformly distributed load)
- **Maximum structural capacity:** 910 kg per module
- **Shelf material:** 3 MDF shelves with 16 mm thickness
- **Frame:** 50 mm steel profile with anti-corrosion epoxy-polyester coating
- **Assembly system:** Boltless interlocking technology (estimated time 15 minutes)
- **Functional equipment:** Rear tool pegboard and drawer with telescopic slides
- **Included accessories:** 4 plastic protective feet for floor preservation
