

Workbench with shelf h905_09

Industrial steel workbench, 3 mm upper top, 200x74.5 cm, structure with 3 uprights and floor-mounting capability.

This **professional workbench** is designed to meet the needs of mechanical workshops and industrial departments requiring an extremely solid workstation. The structure stands out for the use of **heavy-duty steel**, ensuring a non-deformable supporting surface even under intensive mechanical stress.

The dual-level configuration optimizes tool organization: the upper shelf is designed for direct tasks, while the lower one serves as a large storage compartment for bulky components or equipment. Stability is ensured by three structural uprights, treated with **epoxy paint** for superior resistance to wear and typical chemical agents in the work environment.

Technical features

- **Total dimensions:** L. 200 x D. 74.5 x H. 88 cm
- **Upper top:** 3 mm thick sheet steel
- **Lower shelf:** 1.5 mm thick sheet steel
- **Structure:** 3 reinforced vertical uprights
- **Finish:** epoxy powder coating
- **Installation:** floor-mounting capability
