

Workshop bench with drawer units h826_11

Steel monoblock workbench with 3 mm sheet metal top, 800 kg load capacity and two side drawer units. Dimensions 1500x700 mm for workshops.

The **monoblock workbench** is a professional workstation designed to withstand intensive mechanical stress in workshop and manufacturing production contexts. The structure is characterized by an **electrowelded monoblock configuration**, made with metal tubings of differentiated sections that guarantee superior stability and the absence of vibrations during assembly or repair operations.

The operating surface consists of a **3 mm thick steel sheet top**, supported by a reinforced perimeter frame. This combination ensures high impact resistance and the ability to handle heavy loads. The base is equipped with **legs with perforated plates** for permanent floor fixing, optimizing operator safety. The organization of tools is entrusted to **two single-drawer units** positioned under the top, ideal for storing small parts and hand tools.

Technical features

- **Structure:** Monoblock in metal box sections
- **Worktop:** 3 mm thick steel sheet
- **Safety:** Legs provided with plates for floor fixing
- **Reinforcement:** Under-top perimeter frame
- **Storage:** 2 independent drawer units with 1 drawer each
- **Load capacity:** 800 kg (static load)
- **Dimensions:** L.1500 x D.700 x H.890 mm
