

Workshop small parts storage cabinet h972_44

Steel small parts storage cabinet H1600mm with 84 polypropylene 1L bins. Equipped with lockable doors and a reduced depth of 260mm.

The **h972_44 workshop small parts storage cabinet** is a professional storage system designed to ensure the systematic organization of **small parts, nuts and bolts, and small components**. Ideal for workshops, laboratories, and production departments, this module solves issues related to material dispersion, offering complete protection thanks to the impact-resistant **steel structure** and resistance to external agents.
