

Workshop tool workbench h965_02

Workshop workbench in steel and wood, 151x61x144.5 cm, capacity 875 kg. Self-standing structure with rapid boltless assembly.

The **h965_02 tool workbench** represents an advanced technical solution for the setup of workshops, laboratories, and production departments that require high load performance. Designed to ensure maximum stability without the need for mechanical anchoring, this workbench integrates a **steel structure** with a 50 mm profile, treated with epoxy-polyester painting to resist aggressive industrial environments, scratches, and corrosion.

The three-level configuration, enriched by a **back panel** and an upper shelf, optimizes the ergonomics of the workstation, allowing for orderly management of instrumentation. The wooden surface of the shelves ensures solid and versatile support for assembly operations or heavy mechanical maintenance.

Technical specifications

- **Overall dimensions:** W 151 x D 61 x H 144.5 cm
- **Load capacity per shelf:** 600 kg
- **Total load capacity:** 875 kg per module
- **Structure:** Steel with 50 mm profile
- **Finish:** High-resistance epoxy-polyester painting
- **Work surfaces:** 3 high-density wooden shelves
- **Assembly system:** Boltless interlocking (estimated time 15 minutes)
- **Stability:** Self-standing structure with 4 plastic protection feet included
- **Equipment:** Tool-holder back panel and upper shelf
