

Workshop trolley h965_16

Metal and chipboard workshop trolley, 90x40x103 cm. 150 kg load capacity, quick boltless assembly and integrated wheels for maximum operational mobility.

The **h965_16 workshop trolley** represents a technical solution for optimizing workflows in industrial, craft, and logistics environments. Designed to solve the critical issues related to the manual transport of equipment, the trolley combines a self-stable metal structure with wooden loading levels, ensuring reliable support for maintenance and assembly on the move.

Technical specifications

- **Overall dimensions:** W 90 x D 40 x H 103 cm
- **Shelf configuration:** 2 high-density chipboard shelves
- **Load capacity:** 75 kg per single shelf (150 kg total per module)
- **Frame:** Metal with epoxy-polyester coating resistant to chemical agents and wear
- **Assembly system:** Quick boltless interlocking (estimated time 15 minutes)
- **Stability:** Self-supporting structure that does not require anchoring
- **Movement:** Robust wheels for sliding on industrial flooring
- **Color scheme:** Blue/Orange two-tone combination with natural wood inserts
